

**24 Years** of  
Bringing the Stars to  
Maine Schools

Director: John T. Meader    www.northern-stars.com    info@northern-stars.com    207.453.7668

**An Inflatable Traveling Planetarium for Central and Coastal Maine**  
Forget the Bus Ride! We'll Bring the Universe Directly to Your School!

**Northern Stars Planetarium** is an inflatable star theater that utilizes a star projector, slides, video, special effects, and a sound system. With these tools, John Meader, the professional planetarium educator at *Northern Stars*, will introduce your students to many fascinating aspects of astronomy and space science. *Northern Stars Planetarium* shares the wonders of the universe with nearly 20,000 Maine school children each year. Call soon so your class can discover the skies with *Northern Stars*!

**Super Dome or Regular Dome?** We offer two different sized domes. The 16-foot diameter "Regular Dome" fits within the area of typical classroom and accommodates up to 30 students. The 22-foot diameter "Super Dome" holds 65 students. The Super Dome requires a gym, but has a bigger sky and can be more economical. All programming is the same regardless of which dome you choose.

**Show Topics** include: stars, constellations, the solar system, galaxies, space exploration, sky lore, telescopes, weather, volcanoes, oceanography, geography, dinosaurs, cellular biology, birds and migration. Each show is designed for a specific age level, assuring that your show will always be appropriate for your class. Shows are interactive and follow *Maine Learning Results* educational standards. Each show lasts about an hour.

*Free Teacher's Guides* are available at [www.northern-stars.com](http://www.northern-stars.com). We also offer Teacher Workshops and Evening Telescope Star Parties.
